- Involved in Quality checks before the production release.
- Participate in requirement analysis.
- Collaborate with internal teams to produce software design and architecture.
- Responsible for providing Support and Application Enhancement service in a development environment.

PROJECT

McDonald's Restaurant

- Working in a **Development Team** as a Software Engineer. I had the opportunity to work on the POS application for McDonald's sales, as well as on the back-end part also the front-end part of several other apps used in the McDonald's, including POS devices, Kiosks, KVS Screens, and the Drive Thru order process.
- I had the opportunity to work on a change request to add new functionality and make database adjustments.
- Additionally, I have experience working as an Analyst for the **Localization Team**, where I analyse issues, determine their root causes, and suggest configuration changes to the market to satisfy their requirements.
- Actively participated in production calls to build the flow as per process and provide goods and effectively address customer issues.
- **Tech Stacks** – C#, .NET, SQL, HTML, CSS, JavaScript, GIT, JIRA, Teamcity.
